

Amendment to the Specification

The Paragraph beginning at Page 30, lines 30-31, is to be amended as follows:

Figure 6 is a plan view showing a relationship between a set of the tags shown in Figure ~~6a~~ 5a and a field of view of a netpage sensing device in the form of a netpage pen;

The Paragraph beginning at Page 113, lines 6-10, is to be amended as follows:

In the first instance, the scanning optics for sensing coded data and bar codes may be substantially identical. Accordingly, the scanning device may be similar to those shown in Figure 81. In many cases, no modification of the scanning device is required. In some instances however it is necessary to provide an alternative light source ~~6300~~ such as a laser, which generates visible light to allow the 2D bar code to be detected. An example of this is shown in Figure ~~645~~ 114.
